

Knowledge Management for Effective Global Health Programs

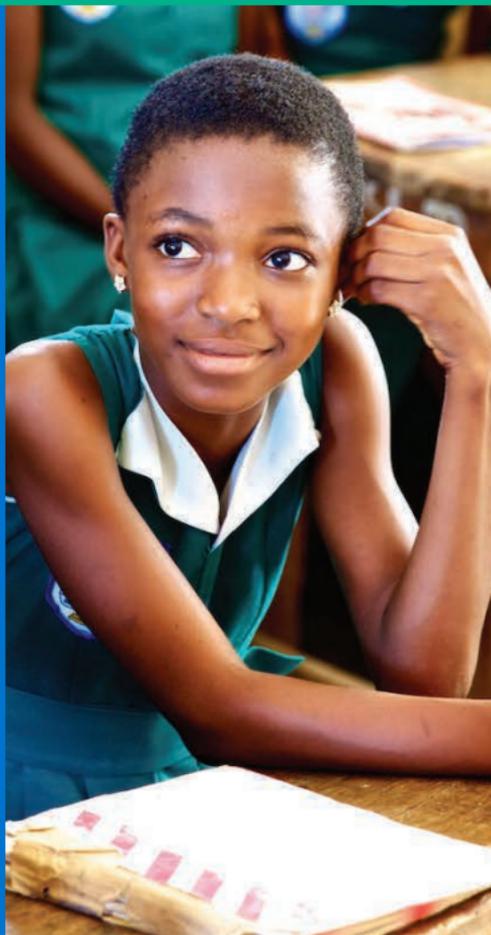

June 7-11, 2021

JHSPH Health, Behavior and Society
Summer Institute

Register for the JHSPH Health,
Behavior, and Society Summer
Institute by May 31, 2021

Knowledge management (KM),
organizational learning (OL) and
adaptive management lead to better
development programs. This
introductory course:

- Introduces participants to KM, OL and adaptive management principles, processes, and tools, and their applicability to the design and implementation of global health efforts.
- Demonstrates, through real-life examples, how KM and OL can be applied to strengthen public health systems and maximize available knowledge to reach public health objectives.
