

SUMMER INSTITUTE

Knowledge Management for Effective Global Health Programs

Course Dates: June 6-10, 2022

Registration Deadline: May 20, 2022

Offered: Virtual or In-Person

Global health programs operate with scarce resources, high stakes and urgent needs for coordination among partners and donors. **Knowledge management provides solutions** to these challenges. Upon completing this course, students will be able to:

Explain knowledge management's role in enhancing organizational performance and improving global health outcomes

Identify the best knowledge management approaches to use in a given public health context

Apply knowledge management to global health programs using a five-step systematic process
