

SUMMER INSTITUTE

# Knowledge Management for Effective Global Health Programs

Course Dates: June 12-16, 2023

Registration Deadline: May 26, 2023

Offered: Virtual

Global health programs operate with scarce resources, high stakes and urgent needs for coordination among partners and donors. **Knowledge management provides solutions** to these challenges. Upon completing this course, students will be able to:

Explain knowledge management's role in enhancing organizational performance and improving global health outcomes

Identify the best knowledge management approaches to use in a given public health context

Apply knowledge management to global health programs using a five-step systematic process
